RESEARCH
EXPERIENCE

IBM Almaden, San Jose, California USA

IBM Research, *September 2017 – December 2017*

- Contributed to novel research algorithm by suggesting subspace projection technique that increased our performance from 15% to 95% accuracy. Designed and implemented environment for testing algorithm.
- Developed baseline and state-of-the-art neural networks using Tensorflow.
- Built data pipeline for large image dataset.

Visa, Palo Alto, California USA

Visa Research, *June 2017 – August 2017*

- Formulated a novel neural network for learning a language model.
- Implemented model and baselines for language generation and question answering using Tensorflow and Facebook’s ParlAI NLP software.
- Performed extensive literature reviews on machine reading comprehension and generative models.

University of Southern California, Los Angeles, California USA

Melady Machine Learning Lab, *November 2015 – May 2017*

- Implemented novel neural network that employed variational inference and adversarial training for transfer learning of multivariate time-series.
- Proposed analyses used in publications to empirically verify that our model (a) performed domain adaptation by creating domain-invariant representations and (b) transferred temporal dependencies across domains. Research led to 2 publications and a patent.
- Communicated research to general public through research feature by the USC Graduate School and to technical audience at ICLR poster presentation.

Stony Brook University, Stony Brook, New York USA

Heavy Ion Research Group, *January 2013 – August 2015*

- Built and maintained a simulator in C++ for the heavy ion particle detector at the Brookhaven National Laboratory.
- Contributed methods from multivariate calculus and linear algebra to particle detection algorithm. Accuracy improved from 60

- Designed and implemented a statistical analysis pipeline in C++ for measuring efficacy of particle detection algorithm.

Sony Brook Univeristy, Sony Brook, New York USA

Computational Neuroscience Group, *Fall 2014*

- Performed spectral analyses on neural data to determine behavioral correlates of neural activity.

California Institute of Technology, Pasadena, California USA

Emotion and Social Cognition Laboratory, *Summer 2014*
