RESEARCH EXPERIENCE	<p>IBM Almaden, San Jose, California USA IBM Research, <i>September 2017 – December 2017</i></p> <ul style="list-style-type: none"> • Contributed to novel research algorithm by suggesting subspace projection technique that increased our performance from 15% to 95% accuracy. Designed and implemented environment for testing algorithm. • Developed baseline and state-of-the-art neural networks using Tensorflow. • Built data pipeline for large image dataset. <p>Visa, Palo Alto, California USA Visa Research, <i>June 2017 – August 2017</i></p> <ul style="list-style-type: none"> • Formulated a novel neural network for learning a language model. • Implemented model and baselines for language generation and question answering using Tensorflow and Facebook’s ParlAI NLP software. • Performed extensive literature reviews on machine reading comprehension and generative models. <p>University of Southern California, Los Angeles, California USA Melady Machine Learning Lab, <i>November 2015 – May 2017</i></p> <ul style="list-style-type: none"> • Implemented novel neural network that employed variational inference and adversarial training for transfer learning of multivariate time-series. • Proposed analyses used in publications to empirically verify that our model (a) performed domain adaptation by creating domain-invariant representations and (b) transferred temporal dependencies across domains. Research led to 2 publications and a patent. • Communicated research to general public through research feature by the USC Graduate School and to technical audience at ICLR poster presentation. <p>Stony Brook Univeristy, Stony Brook, New York USA Heavy Ion Research Group, <i>January 2013 – August 2015</i></p> <ul style="list-style-type: none"> • Built and maintained a simulator in C++ for the heavy ion particle detector at the Brookhaven National Laboratory.
